**Re: Borough Wide Traffic Count Program**
**Borough of Madison**
**Morris County, New Jersey**
**OEA No. MA0704**

Dear Mr. Vogel:

We have completed the Borough wide traffic count program that has included 28 locations. We hereby enclose one (1) bound copy and one (1) unbound copy of the summary report.

The resulting data is a compilation of average daily traffic (ADT) volumes for local, county and state roadways. The program began during the week of November 12, 2007 and was completed during the week of January 7, 2008. Each station recorded data for a consecutive 48-hour period. The two-way ADT data is summarized in the accompanying table. We also enclose a Borough key map illustrating the locations of the numbered count stations. Also appended are copies of the count station print outs including hourly and 15-minute breakdowns. The AM and PM peak hours are highlighted in these reports.
