

Did you know you have access to different town information, forms, and applications, all from the comfort of home?

Your town is on the SDL Portal!

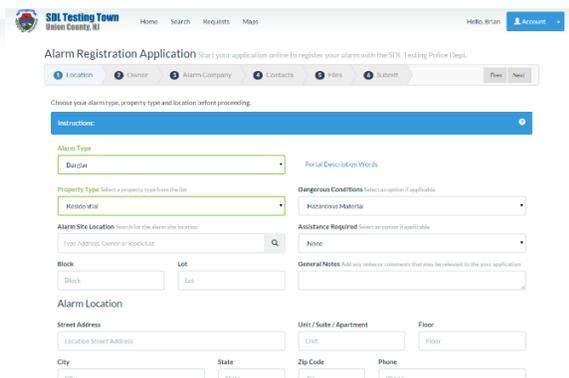

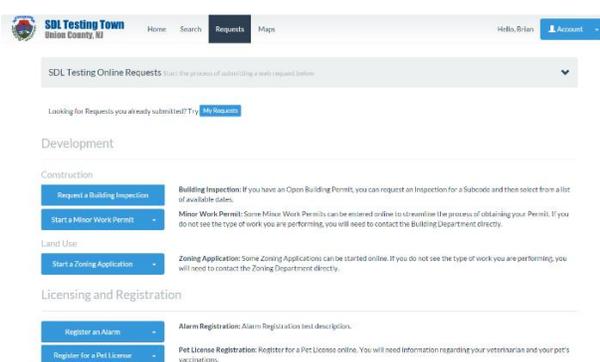

SDL | PORTAL

The SDL Portal is a cloud-based application, designed to give you convenient access to all the town data you could need, wherever you are.

To visit the Portal, click [here!](#)

Submit all your paperwork online

With the use of the Portal, there is no longer a need to travel to the municipal building, or make phone calls to department offices. Instead, you can find all of the resources you need online. Not only do you have access to town requests, applications and forms, but an easy to use step-by-step guide will help you through the process of filling out and submitting all paperwork.

In addition to submitting online forms, the Portal also gives you the ability to instantly make payments and renew licenses, or submit a complaint request.

My Payments Online payment requests for permits, licenses or certificates

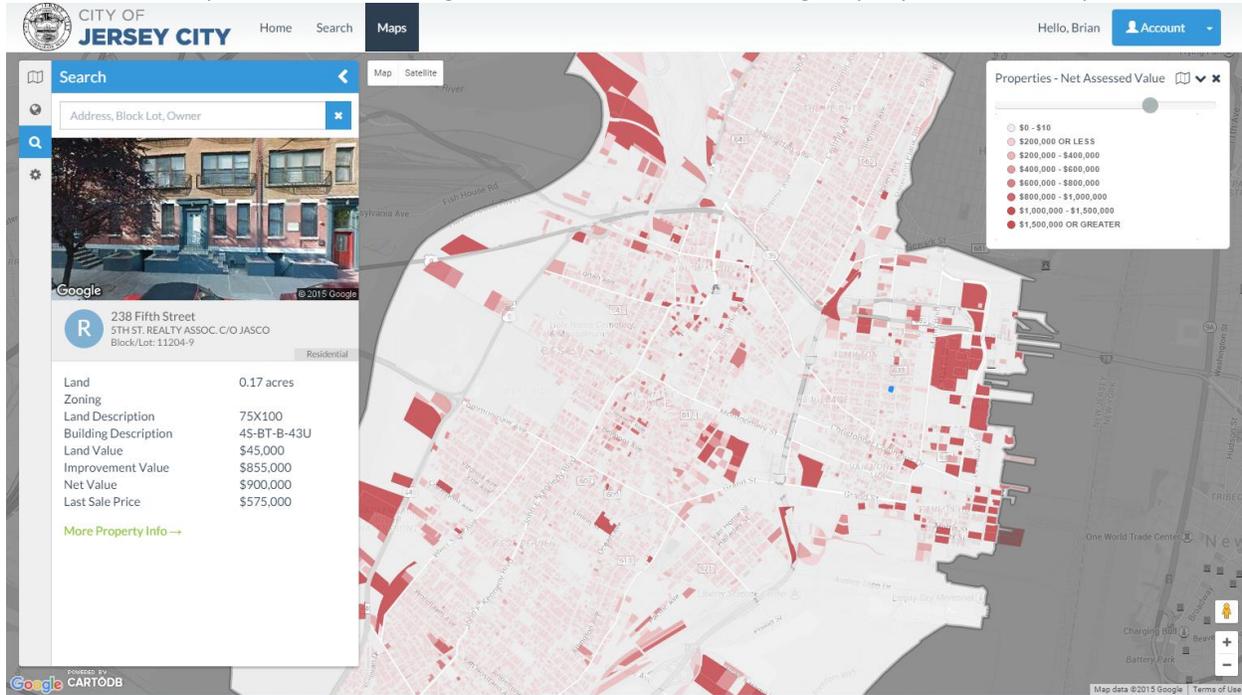

If you have a pending permit, license or certificate application, your town may support the ability to make payments online with a Credit Card or eCheck. The process will be initiated by a town official and you will receive an email with payment instructions.

Tracking Number	Description	Status	Last Updated	Amount
-----------------	-------------	--------	--------------	--------

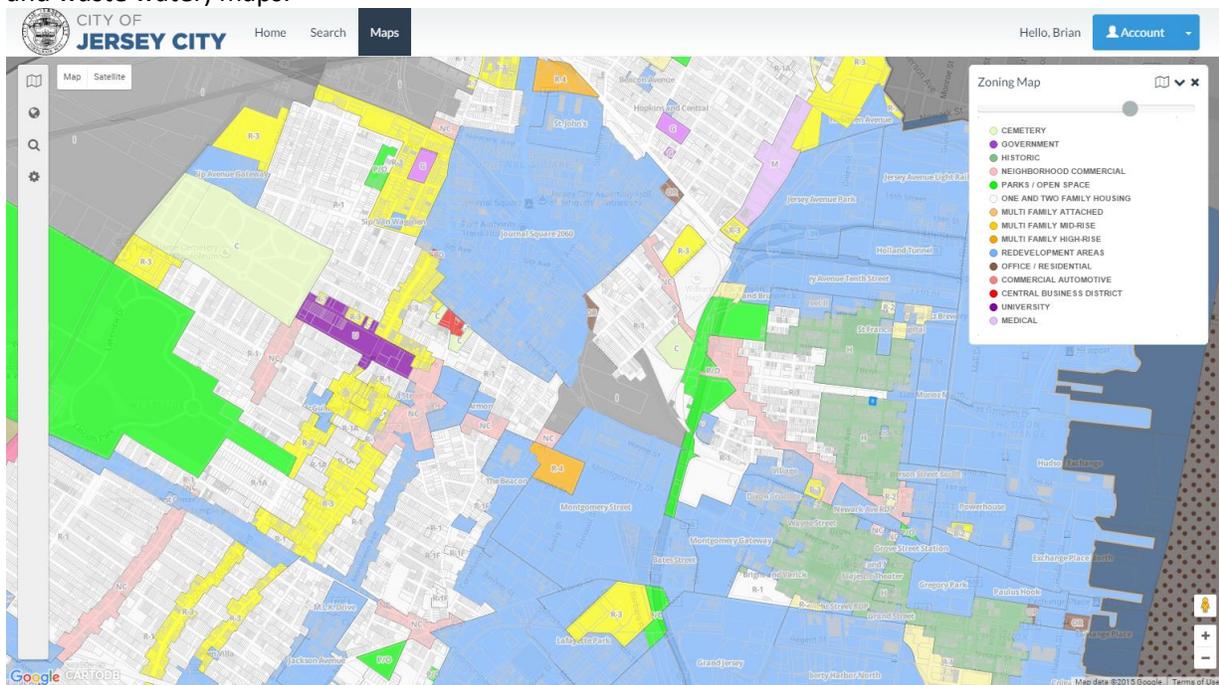

You don't have any pending or completed payments

Locate town-wide or specific property information

The Portal utilizes a robust Geographic Information System (GIS), in order to supply you with the most accurate and up-to-date mapping tools. Users have the ability to quickly and easily locate basic property information for specific locations, or generate town-wide data using map layers and overlays.

Some overlays available through the Portal include zoning, historical districts, wards, and utility (waste and waste water) maps.

Property and construction map filters can also be generated. Property information filters include property class, value, sales and vacancies. Maps generated based on construction permits can be filtered by the date range, work type, status or construction costs.

The screenshot displays the Township of Franklin website's map interface. The top navigation bar includes 'Home', 'Search', 'Requests', and 'Maps'. A user profile for 'Hello, Brian' is visible in the top right. The main map area shows a street grid with several green-shaded properties. A search bar on the left contains the text 'Address, Block Lot, Owner'. Below the search bar is a thumbnail image of a house. A detailed property information panel is open for '150 Farrell St', owned by 'VJ BUILDERS, LLC' (Block/Lot: 345-36.01). The panel lists the following details:

Land	0.36 acres
Zoning	R-15
Land Description	80X200 OR .367 ACRES
Building Description	
Land Value	\$75,000
Improvement Value	\$0
Net Value	\$75,000
Last Sale Price	\$1

A 'More Property Info' link is provided below the table. The map interface also includes a 'Properties - Vacant' filter set to 'VACANT' and a Google Maps logo at the bottom left.

Property Information at your fingertips

With the Portal, you can find information based on the specific property you are looking for. Property information can include everything from tax lot information to data regarding current permits, complaints, violations, licenses and certificates.

Search for specific information with ease

The Portal's convenient search feature allows you to locate a specific property or permit, even with limited information. Search using a full or partial address, owner name, or block/lot number. Searches can also be done using permit or control numbers.

The Portal syncs in real-time, which ensures you are getting the most up-to-date information available.
