SECTION C - FINANCIAL RESPONSIBILITY	Not	applicable
	•	(P P () 1

Please note: In addition to new submittals, any change in the Financial Responsibility Assurance Mechanism as per N.J.A.C. 7:14B 2.2 (including policy renewal date) for an existing facility shall be listed below.

Туре	of Mechanism (i.e. Insurance)	Cal	rrier/Issuing Agency
Effective Date	// Expiration Date	Policy Number	\$Amount of Aggregate Coverage

SECTION D - GENERAL GUIDANCE

FEE: (If applicable) Please make check payable to: "Treasurer, State of New Jersey". Registration and Billing Fee Schedule can

be found in N.J.A.C. 7:14B-3.

PENALTY: Failure by owner or operator of a regulated underground storage tank to comply with any requirement of 7:14B et. seq. may

result in penalties set forth in N.J.S.A. 58:10A-12.

EMERGENCY: If a discharge or spill occurs, the NJDEP Hotline at (877) 927-6337 must be called IMMEDIATELY - 24 hours a day.

EXEMPTION: Residential heating oil underground storage tanks are exempt from the rules as per N.J.S.A. 58:10A-21 et. seq. Please see

N.J.A.C. 7:14B.-1.4(b) for other exemptions.

PUBLICATIONS: Operation and maintenance / record keeping / compliance publications are available on line at www.statc.nj.us/dcp/srp/bust

Suggested publications: "Underground and Storage Tank Owner's Self-inspection Checklist" and "Tank Care".

QUESTIONNAIRE: Initial facility registrations can be submitted on line at www.njdeponline.com (Renewal and modifications need prior DEP pin

code approval to submit on line).

MAILING: UST Registration Certificates are mailed directly to the facility to be displayed prominently as per N.J.A.C, 7:14B-2.6

SECTION E - CERTIFICATION

Must be signed as follows:

- For a corporation, by a person authorized by resolution of the Board of Directors to sign the document.
- For a partnership or sole proprietorship, by a general partner or the proprietor, respectively.
- · For a municipality, State, Federal or other public agency, by either a principal executive officer or ranking elected official.
- For persons other than indicated above, by the person with legal responsibility for the site.

"I certify under penalty of law that I have personally examined and am familiar with the information submitted in this application and all attached documents, and that based on my inquiry of those individuals responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant civil penalties for knowingly submitting false, inaccurate or incomplete information and that I am committing a crime of the fourth degree if I make a written false statement which I do not believe to be true. I am also aware that if I knowingly direct or authorize the violation of any statute, I am personally liable for the penalties.

	ate)	Facility UST #

SECTION F - DEFINITIONS

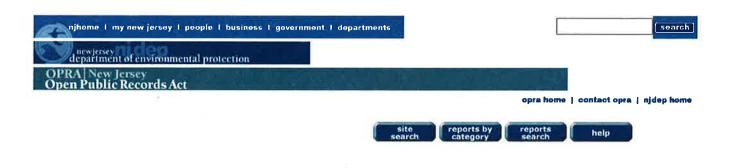

- Section B7 C. "European" Suction Piping Suction piping which has enough slope so that the product in the pipe can drain back into the tank when the suction is released, and which has only one check valve, located directly beneath the pump in the dispensing unit. Any underground storage tank equipped with "European" Suction Piping has no monitoring detection requirements for piping.
- Section B9 I. In-Line Electronic Pressure Monitor (Used with pressurized piping only) A monitor which checks for loss of pressure within piping when no product is dispensed. This method may be used once every 30 days or every time the dispenser turns off.
- Section B9 J. Automatic Line Leak Detectors (Used with pressurized piping Must be able to detect a 3 gph leak within 1 hour of its occurrence). Types of detectors are:
 - Flow restrictors and flow shut offs which monitor pressure within piping. When a suspected leak is detected, either restricts the flow
 of product through the piping well below the 3 gph leak rate it detects, or completely cuts off product flow and shuts down the
 pump.
 - 2. Continuous alarm systems which constantly monitor piping conditions and trigger an audible or visual alarm if a leak is suspected.
- Section B12 B. **Out of Service Storage Tank** Any underground storage tank system in which hazardous substances are contained or have been contained, but from which hazardous substances are not or have not been introduced or dispensed pending a decision to close the system or begin reuse of the system.

Please Note: Underground storage tank systems which are out of service shall comply with the provisions of N.J.A.C. 7:14B-9-1. The owner or operator of an underground storage tank system which is out of service for a period greater than three months shall follow the guidelines in the current American Petroleum Institute Bulletin #1604. The owner or operator may request that the underground storage tank system remain out of service for a period of more than 12 months without having to permanently close the tank system by complying with the provisions of N.J.A.C. 7:14B-9.1(b) by submitting a Site Investigation (SI) Report at least 30 days before expiration of the 12 month period.

Section B13 B. Sump - Any underground storage tank used to collect or contain a hazardous substance for no more than 48 hours.

Section B15 Wellhead Protection Area

- 1. The area within a 2,000 ft radius surrounding a public community or public non-community water system well when there is an underground storage tank containing gasoline or non-petroleum hazardous substances located within that area.
- 2. The area within a 750 ft. radius surrounding a public community or public non-community water system well when there is an underground storage tank containing petroleum products other than gasoline located within that area.

Site Coordinates 515356 700743
