

Borough of Madison, New Jersey

COVID-19 Update 7/7/21

Since the arrival of COVID-19 in early March 2020, there have been a total of 878 confirmed (PCR test) and 339 probable (antigen test) COVID-19 cases reported in Madison Borough*. The chart to the right shows the trend in reported cases over time. The number of new cases has decreased and vaccination against COVID-19 continues. However, public health departments across New Jersey continue to closely monitor emerging variants of concern, breakthrough cases among the fully-vaccinated, outbreaks associated with end-of-year and summer events, and new clusters in communities with low vaccination rates as well as aggressively pursue contact tracing to prevent further community spread and additional outbreaks where possible.

*More information on the definitions “confirmed” and “probable” as well as “PCR” and “antigen” tests can be found [HERE](#).

COVID-19 Cases, Incidence Rate, Deaths, and Case Fatality Rates New Jersey vs. Morris County vs. Madison Borough

	Total Confirmed Cases	Total Probable Cases	Cumulative Incidence Rate per 100k	% of Cases Who Are Facility Residents*	Total Deaths	Overall CFR**	Total COVID Cases Reported by Facilities - Residents*	Total COVID deaths Reported by Facilities - Residents*	CFR** for Facility Residents*
New Jersey	894,007	130,458	10,065	3.7%	23,774	2.7%	32,796	7,878	24.0%
Morris County	42,077	8,338	8,555	4.4%	980	2.3%	1,838	527	28.7%
Madison	878	339	4,973	7.4%	23	2.6%	65	14	21.5%

*Residents of long term care or assisted living facilities or group homes

** Case Fatality Rate is the percentage of COVID-19 cases who have died from COVID-19 related illness
