

# Borough of Madison, New Jersey

## COVID-19 Update 12/22/21

Since the arrival of COVID-19 in early March 2020, there have been a total of 1,290 confirmed (PCR test) and 438 probable (antigen test) COVID-19 cases reported in Madison Borough\*. The chart to the right shows the trend in newly reported cases throughout the pandemic. While the number of newly reported cases remained relatively steady throughout the fall, the combination of increased large, indoor holiday gatherings and the introduction of the highly-transmissible Omicron variant has led to a sharp increase in cases throughout New Jersey. [According to the CDC](#), as of December 18, 2021, the Omicron variant is now identified in 92% of samples tested in the NY/NJ region; this exponential increase occurred in less than four weeks. While breakthrough infections among fully-vaccinated individuals are now more common due to the Omicron variant, cases of serious illness and hospitalizations have not reached the levels seen during the 2020-2021 winter season surge. More information on these trends can be found on the [NJDOH COVID-19 Data Dashboard](#).

\*More information on the definitions “confirmed” and “probable” as well as “PCR” and “antigen” tests can be found [HERE](#).

### COVID-19 Cases, Incidence Rate, Deaths, and Case Fatality Rates New Jersey vs. Morris County vs. Madison Borough

	Total Confirmed Cases	Total Probable Cases	Cumulative Incidence Rate per 100k	% of Cases Who Are Facility Residents*	Total Deaths	Overall CFR**	Total COVID Cases Reported by Facilities - Residents*	Total COVID deaths Reported by Facilities - Residents*	CFR** for Facility Residents*
New Jersey	1,186,847	186,365	13,362	2.9%	25,948	2.2%	34,652	8,049	23.2%
Morris County	57,356	11,800	11,661	3.3%	1,069	1.9%	1,886	529	28.0%
Madison	1,290	438	7,307	5.0%	27	2.1%	65	14	21.5%

\*Residents of long term care or assisted living facilities or group homes  
 \*\* Case Fatality Rate is the percentage of COVID-19 cases who have died from COVID-19 related illness
