

Borough of Madison, New Jersey

COVID-19 Update 1/19/22

Since the arrival of COVID-19 in March 2020, there have been a total of 2,260 confirmed (PCR test) and 559 probable (antigen test) COVID-19 cases reported in Madison Borough*. The chart to the right shows the trend in newly reported cases throughout the pandemic. Home-based COVID-19 tests are not required to be reported to public health authorities and thus remain unrepresented in case-count data. Fortunately, it appears that the recent spike in COVID-19 cases driven by the highly-transmissible Omicron variant has begun trending downward, even though overall community transmission remains high. Additionally, breakthrough infections among vaccinated individuals are now more common due to the Omicron variant. According to the [CDC Nowcast model](#), in the week ending January 15, 2022, the Omicron variant is predicted to be identified in 99.8% of samples tested in the NY/NJ region. Total hospitalizations for COVID-19 are also high across New Jersey, although the overall proportion of COVID-19 cases requiring hospitalization is lower than the 2020-2021 winter season surge. More information on these trends can be found on the [NJDOH COVID-19 Data Dashboard](#).

*More information on the definitions “confirmed” and “probable” as well as “PCR” and “antigen” tests can be found [HERE](#).

COVID-19 Cases, Incidence Rate, Deaths, and Case Fatality Rates New Jersey vs. Morris County vs. Madison Borough

	Total Confirmed Cases	Total Probable Cases	Cumulative Incidence Rate per 100k	% of Cases Who Are Facility Residents*	Total Deaths	Overall CFR**	Total COVID Cases Reported by Facilities - Residents*	Total COVID deaths Reported by Facilities - Residents*	CFR** for Facility Residents*
New Jersey	1,759,273	278,417	19,807	2.5%	27,593	1.6%	43,578	8,270	19.0%
Morris County	93,338	16,369	18,977	2.8%	1,137	1.2%	2,590	541	20.9%
